# **GROWING CANNABIS**

## **SUSTAINABLE CULTIVATION IN SOUTHERN OREGON**

**APWC LECTURE SERIES: WINTER/SPRING 2017**

*presented by*

### **SUPPORTING THE SMALL FAMILY FARM**

The Oregon SunGrower's Guild's mission is to "advocate for SunGrown cannabis. We are dedicated to the development and preservation of small family farms, producing SunGrown cannabis, seeds, and genetics in a clean sustainable and conscientious manner. We believe that sustainable SunGrown agricultural methods produce a superior holistic product for medical patients as well as recreational cannabis users."

The *Oregon SunGrower's Guild (OSGG)* will provide a presentation and discussion on Cannabis cultivation in Southern Oregon. They will discuss the history, the market, the overall cultivation, Best Management Practices, legal and social issues, medical uses, and how the growers can connect with the community. There will be a moderated question and answer period at the end of the lecture.

The lecture will take place Tues., March 14th at the Applegate Fire District #9 Training/Conference room, 1095 Upper Applegate Road, Ruch from 7-8:30pm. Refreshments will be provided.
